

SCHEDULE 1: Designations

1.0 OVERVIEW

1.1 Purpose of a Designation

Part VIII of the Resource Management Act 1991 deals with Designations. A Designation is a provision made in the District Plan to give effect to a requirement by a Requiring Authority. A designation over an area of land allows the Requiring Authority to use that land in accordance with the designation, without the need for a land use consent. No person may use that land without the permission of the Requiring Authority in a way which would prevent or hinder the public work or project or work to which the designation relates.

A Requiring Authority means any Minister of the Crown, Local Authority or Network Utility Operator, approved under Section 167 of the Act.

1.2 Existing Designations

The process to include existing designations in the Proposed District Plan is described in Clause 4 of the First Schedule of the Act. Prior to a Territorial Authority publicly notifying a Proposed District Plan, it is required to invite Requiring Authorities which have an existing designation in the Transitional District Plan, to give written notice advising that the designation is required to be included in the Proposed District Plan, with or without modification. A modification means that earlier the boundary, purpose or some other aspect of the existing designation has been changed in some way.

Where the Requiring Authority states that a designation is to be included in the plan with modification, it is required to submit the nature of and reasons for the modification.

If no notification is given to the Territorial Authority, then that designation will not be included in the Proposed District Plan. A designation lapses on the expiry of 5 years after the date which it is included in the Proposed District Plan unless it is given effect to before the end of that period.

1.3 New Requirements for Designations

The process for new requirements for designations is specified in Part VIII of the Act. A new requirement for a designation can be made at any time, but Requiring Authorities have the opportunity to include any new requirements in the Proposed District Plan, for public notification pursuant to Section 170 of the Act. Section 168 of the Act and Form 12 of the Resource Management (Forms) Regulations 1991 prescribe the information to be supplied with new requirements.

1.4 Public Submission Process

Submissions in support or opposition to a new requirement may be made under Section 169 of the Act. Submissions in support or opposition to a designation or new requirement notified with the Proposed District Plan can be made as part of the public notification process of the Proposed District Plan.

SCHEDULE 1: Designations

1.5 Determination of Designations

If no submissions are received on an existing designation included in the District Plan, Council can allow the designation to continue without making any recommendations. However, for new requirements, Council must make a recommendation to the Requiring Authority. The Requiring Authority then decides whether or not to accept the recommendation.
