1.1 INTRODUCTION

This Building Pre-Inspection Report ("**Report**") has been prepared in accordance with the requirements of the Horowhenua District Plan. It accurately records the external condition of the building to be relocated and sets out all reinstatement work required to the exterior of the building after it has been relocated to bring it up to a workmanlike standard and to achieve a tidy appearance.

Limited inspection of the interior of the building to be relocated has been undertaken for the purpose of the building consent application which must be lodged with the Horowhenua District Council at the same time as this Report is submitted to the Council.

This Report confirms whether the building to be relocated is considered safe and sanitary.

This Report has been prepared by _____ of _____ as per our instruction/agreement dated _____ on behalf of our clients _____ in accordance with the requirements of the Horowhenua District Plan.

- Signs of water ingress will be searched for during the building inspection undertaken for the purpose of this Report, however this Report cannot warrant that the building is free from water penetration, from defective roofing, cladding, rainwater goods, rising damp or the like unless evident at the time of visual survey.
- Only areas where safe access is possible have been inspected.
- This Report is provided for the use of the Applicant identified in Section 1.1 of this Report and the Horowhenua District Council and may not be used by others without written permission by those parties. The writer of this Report accepts no liability to third parties who may act on this Report.
- This Report is for the purpose of meeting the requirements of the Horowhenua District Plan. It is not a report to address matters required by the Building Act 2004, except that it requires a declaration regarding whether the building is/isn't safe and sanitary, and has provision for information regarding bearers & floor joists, flooring, wall framing, subfloor cladding & ventilation, and smoke detectors in order to facilitate the building consent process.
