

SCHEDULE 1: Designations

1. DESIGNATIONS

1.1 PURPOSE OF A DESIGNATION

Under the provisions of the RMA, a Minister of the Crown or a local authority with financial responsibility for a public work, or a network utility operator which has been approved as a requiring authority under Section 167 of the RMA, may designate land for public works.

The effect of designating land is to authorise the use of that land for a particular work. Once a designation is in place it takes precedence over the zoning of the land. Other people may not, without the prior written consent of the requiring authority, do anything in relation to the designated land that would impede the public work.

The 'underlying zone' of a designation applies to any other activities that are for a purpose different to the designation purpose (or activities undertaken by a party other than the requiring authority) under s176 of the RMA. Any activity or works outside the scope of a designation will require resource consent unless the activity or works are a permitted activity within the underlying zone.

1.2 EXISTING DESIGNATIONS

The process to include existing designations in the Proposed District Plan is described in Clause 4 of the First Schedule of the RMA. Prior to a Territorial Authority publicly notifying a Proposed District Plan, it is required to invite Requiring Authorities which have an existing designation in the Operative District Plan, to give written notice advising that the designation is required to be included in the Proposed District Plan, with or without modification. A modification means that the earlier boundary, purpose or some other aspect of the existing designation has been changed in some way.

Where the Requiring Authority states that a designation is to be included in the District Plan with modification, it is required to submit the nature of and reasons for the modification.

If no notification is given to the Territorial Authority, then that designation will not be included in the Proposed District Plan. A designation lapses on the expiry of five years after the date which it is included in the Proposed District Plan unless it is given effect to before the end of that period.

1.3 NEW REQUIREMENTS FOR DESIGNATIONS

The process for new requirements for designations is specified in Part VIII of the RMA. A new requirement for a designation can be made at any time, but Requiring Authorities have the opportunity to include any new requirements in the Proposed District Plan, for public notification pursuant to Section 170 of the RMA. Section 168 of the RMA and Form 12 of the Resource Management (Forms) Regulations 1991 prescribe the information to be supplied with new requirements.

1.4 PUBLIC SUBMISSION PROCESS

Submissions in support or opposition to a new requirement may be made under Section 169 of the RMA. Submissions in support or opposition to a designation or new requirement

SCHEDULE 1: Designations

notified with the Proposed District Plan can be made as part of the public notification process of the Proposed District Plan.

1.5 DETERMINATION OF DESIGNATIONS

If no submissions are received on an existing designation included in the Proposed District Plan, Council can allow the designation to continue without making any recommendations. However, for new requirements, Council must make a recommendation to the Requiring Authority. The Requiring Authority then decides whether or not to accept the recommendation.

SCHEDULE 1: Designations

Appendix 1: Designation Conditions

Telecom New Zealand Limited and Chorus New Zealand Limited

Masts and Antennas

The height of any (new) mast and associated antennas (including any lightning rod) shall not exceed the following height limits in the respective underlying zones of the designations:

<i>Residential</i>	<i>15m</i>
<i>Rural</i>	<i>25m</i>
<i>Commercial (within Pedestrian Overlay Areas)</i>	<i>20m</i>
<i>Commercial (outside Pedestrian Overlay Areas)</i>	<i>15m</i>

2. Notwithstanding condition 1, the antennas on the mast existing as at 14 September 2012 (the notification date of Proposed District Plan) may be upgraded, reconfigured or additional antennas installed subject to there being no increase in the overall height of the mast and attached antennas.

3. Antennas mounted on the roof of buildings shall not exceed more than 3 metres above the maximum height of the roof of any existing building in the Residential or Commercial (outside Pedestrian Overlay Areas) zones, and 6 metres above the maximum height of the roof of any existing building in the Rural or Commercial (within Pedestrian Overlay Areas) zones.

Buildings

4. Any buildings, excluding masts, exhaust flues, antennas and air conditioning equipment shall be contained within the following building envelope:

Residential and Commercial (outside Pedestrian Overlay Areas)

<i>Height</i>	<i>8.5m</i>
<i>Boundary Setback</i>	<i>3m from a road boundary and 1.5m from any other boundary</i>
<i>Floor Area</i>	<i>50m²</i>

Rural and Commercial (within Pedestrian Overlay Areas)

<i>Height</i>	<i>15m</i>
<i>Boundary Setback</i>	<i>3m from a road boundary and 1.5m from any other boundary</i>
<i>Floor Area</i>	<i>50m²</i>

Except this shall not restrict the maintenance, upgrading and replacement of any existing building where it infringes this condition provided there is no additional exceedence of the standards with this condition.

Height in relation to boundary - shall comply with the relevant height in relation to boundary controls from adjoining residential boundaries as included in the Horowhenua District Plan as at the 14 September 2012 (the notification date of Proposed District Plan).

Noise

5. Any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation) shall not exceed the following noise limits:

SCHEDULE 1: Designations

At the boundary with any Rural or Residential Zoned land:

7am - 10pm: 55 dBA. L10
10pm - 7am: 40 dBA.L10
10pm - 7am: 65 dBA. Lmax

At the boundary with any Commercial Zoned land:

At any time on any day: 65 dBA. L10

6. Any new noise generating equipment (excluding any electricity alternator required for emergency backup power generation) shall cumulatively in combination with any other noise generating equipment on the site not result in any increase in existing noise levels received at any other property boundary where the noise levels in Condition 5 are exceeded. A noise assessment shall be submitted as part of any outline plan to confirm the existing noise levels and predicted new noise level to confirm compliance with this condition.

7. For any changes or additions to any electricity alternators on the site, where the noise from all electricity alternators exceeds the noise limits in Condition 5, an Outline Plan shall be required which demonstrates how the equipment and any mitigation is the best practicable option (BPO) to ensure that noise levels do not exceed a reasonable level, and do not exceed existing noise levels.

Radiofrequency Fields

8. Any equipment transmitting radiofrequency energy shall comply with the exposure levels stated in New Zealand Standard *NZS2772.1:1999.1* at all times.

Outline Plan of Works

9. That an Outline Plan of works shall not be required for any internal building works (excluding equipment generating external noise), general site maintenance and repair work, like for like replacement of equipment, or for the replacement of any antennas with antennas of similar size, provided that there is no overall increase in the overall height of the facility.
